
INDUSTRIES OF THE FUTURE PENNSYLVANIA SYMPOSIUM

STEERING PENNSYLVANIA INDUSTRIES INTO THE FUTURE

JUNE 20 AND 21, 2000

A Symposium to Position Pennsylvania Industries for Global Growth via Alliances and Partnerships in Advanced Technologies

The Industries of the Future—Pennsylvania Symposium will chart the path for Pennsylvania companies to become world leaders in technology-intensive manufacturing. Building on national Industries of the Future efforts, the symposium will help establish alliances of companies, in partnerships with State/Federal government programs, to jointly undertake activities to achieve common goals. Through this symposium, the common goals of each of the six Pennsylvania industries—food, glass, metals, mining, plastics, and steel—will be determined by industry leaders with facilitation from government officials and industry-led steering committees.

WHO SHOULD ATTEND?

Steel, metals, glass, mining, plastics, and food processing industry members as well as company owners, plant managers, research/engineering directors, and others involved in decision-making of advanced manufacturing technologies. Research institutions and local trade organizations are encouraged to attend.

WHY ATTEND?

- Become a member of alliances to develop Pennsylvania's industry vision for the 21st century.
- Benefit from partnerships, obtaining resources and support from State/Federal government and national associations.
- Become part of a winning strategy that has been successfully implemented at the national level since 1995, also known as the Industries of the Future.
- Foster collaboration in precompetitive R&D, using advanced manufacturing technologies to sustain growth and attain high and better paying jobs.

ABOUT THE NATIONAL-LEVEL INDUSTRIES OF THE FUTURE

The Industries of the Future strategy creates partnerships between industry, government, national laboratories, and research institutions to develop and deliver advanced technology solutions for industrial applications. Led by the DOE Office of Industrial Technologies, the strategy is being implemented in nine energy- and waste-intensive industries—agriculture, aluminum, chemicals, forest products, glass, mining, metalcasting, petroleum, and steel industries. The national-level industry Visions and technology Roadmaps are available by contacting the OIT Clearinghouse at (800) 826-2086.
